DETAILED ACTION

1. The rejection over EP 744393 is withdrawn in view of amendment, the declaration of Jacob Emert, and associated remarks. The claims have been amended to require a phenothiazine-containing component, and the reference discloses such use only in a comparative example in combination with a polymer which would not be expected to have the required terminal vinylidene content.

Claim Rejections - 35 USC § 112

2. Claims 1-4, 6-9, 12 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention for the reason set forth in item 4 of the Office action mailed 4/5/2007.

Applicant's arguments filed 5/23/2007 have been fully considered but they are not persuasive. Applicants assert that the phrase "in the substantial absence of halogen" would be interpreted to mean that the reaction of the polyalkene and the enophile is conducted "without halogen assistance," which apparently means that "halogen in a form capable of accelerating the reaction of the polyalkene and the enophile is not provided in amounts sufficient to affect the reaction rate/yield" (see second page of applicants' remarks). However, there is nothing in the specification or claims which imposes this particular definition on the claims, and there is nothing in the claims which recites any connection between a halogen component and the rate or yield

Art Unit: 1713

of the reaction. Furthermore, there is nothing in the claims which imposes any restriction on which component(s) may include halogen, or on the permissible amount, or on the function of such halogenated species in the overall reaction process.

Accordingly, applicants' argument is not accepted because there is nothing in the claims or the specification to lead the ordinary skilled worker to conclude that the meaning of "in the substantial absence of halogen" is limited to the particular meaning described in applicants' remarks.

3. Although currently withdrawn from consideration, applicants are advised that if rejoined, claims 10 and 11 would be indefinite because they depend, either directly or indirectly, from cancelled claim 5.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
